IOM VISION

IOM Cameroon’s strategic crisis response approach rests on two key pillars: emergency response to crisis and peacebuilding, and transition and recovery, while mainstreaming the humanitarian-development-peace nexus. To this end, IOM Cameroon provides critical information on displacement and needs to the broader humanitarian and development community, and tailored lifesaving assistance and protection, with a community-based approach. Through this approach, IOM aims to address the underlying causes and drivers of crisis, opening avenues for durable solutions to displacement, and provide support to conflict management and reduction while building community resilience so that communities progressively transition away from urgent needs through sustainable development.
