IOM VISION

UPDATED: SEPTEMBER 3, 2024

IOM collaborates closely with the Government of Mozambique and communities to address critical humanitarian needs resulting from conflict and disasters and support the recovery of impacted communities, including displaced persons and their host communities. IOM also seeks to address the drivers of conflict and disaster displacement, and support communities to attain durable solutions. IOM is also working to strengthen the resilience of communities to future shocks, including disasters and other adverse effects of climate change and environmental degradation. Through the development of collective outcomes that support coherent and complementary coordination, programming and financing across IOM programmes and partners, IOM mainstreams the humanitarian–development–peace nexus across its interventions.
