

IOM Transhumance Tracking Tool enumerator monitoring transhumance flows in Burkina Faso. © IOM Burkina Faso, 2020

## IOM VISION

With climate change impacting the route and calendars of nomadic herders throughout Western and Central Africa, imposing upon all stakeholders the need to ensure peaceful cohabitation between all groups and reduce the risk of violence and forced displacement due to competition over access natural sources, IOM aims to continue to support, at the local level, its Member States to develop early alert mechanisms and to reinforce local conflict mitigation strategies to pre-empt the risk of conflicts associated with herds movements, and, at the regional level, ECOWAS, its Member States, the Regional Herders Network and its national members, promoting multilateralism by ensuring that ECOWAS remains the forum where international transhumance is managed in a harmonized way.
