IOM VISION

UPDATED: MARCH 10, 2021

In 2021, IOM will address the acute and growing humanitarian emergency – currently the largest in the world – through the provision of frontline multi-sectoral humanitarian assistance in locations where the Organization has access and vulnerabilities are high. In addition, IOM's priority is to also to expand programming that tackles the pre-existing drivers of fragility, as Yemen grapples with a deteriorating economy and weakened institutions and infrastructure. With this, IOM will enhance the resilience of individuals and communities through inclusive programming that aims to address multi-dimensional vulnerabilities, improve social cohesion, strengthen local institutions, sustain livelihoods and restore public infrastructure.
